RESOURCE POOL PURPOSE

The Resource Pool is a group of volunteers in the Conference who are available to provide leadership with congregations or other groups to put on educational events. Resource Pool members have all participated in training events which focus on providing a common planning process for events.

Requests for Resource Pool are received by the Co-ordinator who then matches the request with leaders from the Resource Pool who have the interests and skills to facilitate the particular event. Leadership and planning is done in conjunction with the local group.

These services to congregations and groups are provided through the Conference budget and therefore are equally available to all, no matter where the group is located or what it might be able to afford.
